

CHILD WELL-BEING SURVEY 2017

Child care for children 12 and younger in Greater Cincinnati

INTERACT

FOR HEALTH

The 2017 **Child Well-Being Survey** (**CWBS**) asked Greater Cincinnati and Northern Kentucky parents and guardians with children age 12 and younger, "Do you currently have any child care arrangements for (your child), such as care during the day while you work outside of the home or before- or after-school care?"

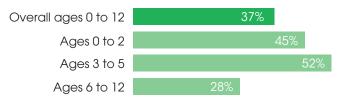

ABOUT HALF OF PARENTS WITH CHILDREN AGE 5 OR YOUNGER REPORT THEY HAVE CHILD CARE

Nearly 4 in 10 parents in the region with children up to age 12 reported that they have some sort of child care arrangements (37%). Parents of younger children were more likely to report this. Nearly half of caregivers with children up to age 2 reported that they had child care arrangements (45%). More than half of parents with children ages 3 to 5 reported this (52%).

CHILD CARE VARIES BY RACE, NUMBER OF ADULTS IN HOUSEHOLD

Responses varied by race. Five in 10 parents and guardians of

Percentage of parents and guardians in the region who have child care arrangements for a child age 12 or younger

Percentage of parents and guardians who have child care arrangements for child age 12 or younger, by race

* Includes Asian, Native Hawaiian or other Pacific Islander, American Indian or Alaska Native, or some other race.

African American children (50%) reported that they had child care arrangements. This compared with 3 in 10 parents and guardians of White children (34%).

Responses also varied by the number of adults in the household. Nearly half of families with only one adult in the household had child care arrangements (46%). That compares with fewer than 4 in 10 families with two adults in the household (36%).

RELATIVE OR FRIENDS MOST COMMONLY USED FOR CHILD CARE

CWBS also asked, "Which one of the following categories best describes the primary child care arrangement you have for (your child)?" Respondents were given 10 choices. The most common response in the region overall was a relative or friend.

Continued on next page

These findings, unless otherwise noted, are from the Child Well-Being Survey, sponsored by Cincinnati Children's and Interact for Health with support from the United Way of Greater Cincinnati. The Child Well-Being Survey was conducted March 5-Aug. 9, 2017, by the Institute for Policy Research at the University of Cincinnati. A random sample of primary caregivers from the Greater Cincinnati region was interviewed by telephone about one randomly selected child in the household. This included 1,056 interviews conducted over landline telephones and 1,701 interviews conducted over cell phones. In 95 out of 100 cases, the estimates will be accurate to $\pm 1.9\%$. There are other sources of variation inherent in public opinion studies, such as nonresponse, question wording or context effects that can introduce error or bias. For more information about the Child Well-Being Survey, please visit www.interactforhealth.org/child-well-being-survey or www.cincinnatichildrens.org/service/j/anderson-center/health-policy/well-being.

Which one of the following categories best describes the primary child care arrangement you have for

(your child)? (Percentages may not add to 100 percent because of rounding.)

Up to age 2		42%		21%	10%	14%	10% 2 <mark>%2%</mark>

Responses varied by the age of the child. (See graph.) A relative or friend is one of the most common arrangements for all ages. Three in 10 of the region's families with children ages 3 to 5 use a preschool or kindergarten not affiliated with their local school district (30%), while fewer than 1 in 10 use a preschool or kindergarten that is affiliated with their local public school (5%).

CHILD CARE ARRANGEMENTS VARY BY INCOME

About 4 in 10 families of all income levels with child care arrangements used a relative or friend for child care. However, use of a child care center varied by income. About 3 in 10 adults earning less than 200% of the Federal Poverty Guidelines (FPG)¹ used a child care center (31%). This compares with only 5% of families earning more than 200% FPG.

¹ In 2016, 200% of the Federal Poverty Guidelines was \$48,500 for a family of four

WHY WE ASK THESE QUESTIONS

Child care plays an important role in a child's early development. Child care also provides families the opportunity to work and earn income. These questions help us to better understand the child care needs in our region and can inform the conversation about improving access to child care for all families.
