

Large majority of Kentucky adults favors tobacco-free school policies

Nearly 9 in 10 cigarette smokers first tried smoking by age 18.¹ In Kentucky, 41% of high school students have tried cigarettes, according to the 2017 Youth Risk Behavior Survey.² Policies for tobacco-free environments in schools can help youths avoid tobacco and support those who want to quit.

To understand Kentucky adults' opinions about this topic, the **Kentucky Health Issues Poll (KHIP)** asked, "Research indicates that the younger a person is when they first try tobacco, the more susceptible they are to becoming addicted. To help keep kids from smoking, some school systems are adopting tobacco-free campus policies that would prohibit the use of tobacco by students, staff, parents or guests while they are on school grounds or at school-sponsored activities, such as field trips and sporting events. Would you favor or oppose schools adopting tobacco-free campus

policies in your community?" KHIP is funded by Interact for Health and the Foundation for a Healthy Kentucky.

STRONG SUPPORT FOR TOBACCO-FREE SCHOOLS

Nearly 9 in 10 adults (87%) favored schools adopting tobacco-free campus policies in their communities.

Adults in households with children (90%) and without children (85%) in the home both supported tobacco-free school policies. Majorities of adults in all political parties in Kentucky strongly favored tobacco-free school policies.

Support for tobacco-free school policies has been consistently strong. In 2015 85% of Kentucky adults favored them and in 2013 84% favored them.

At present, only 39% of Kentucky school districts have 100% Tobacco-Free School District policies.³ During the 2017 Kentucky legislative session, Senate Bill 78, which would have prohibited tobacco use on school property, passed out of the Senate but died in the House Education Committee.
